FIRST MOTHER APPLICATIONS

What Do You Care About Today?

At the time of shipping more than 12 applications for Mother will be available. The number of applications will increase over time, as new applications are developed by Sen.se. Sen.se will also provide tools to allow partners and the community of developers to create applications for Sen.se devices. For updates, visit Sensemother.com.

Walk

Are you active enough to keep fit? Find out how many steps you walk every day, the distance you cover and calories you burn.

Espresso

How many espressos are you guzzling? Too many in the evening or in the middle of the night? Find out when you're about to run out.

Presence

Who's home right now? What are the times people are usually in the house or away? Use this data to optimize your boiler settings, for example.

Teeth

Are your kids brushing their teeth properly – and are you? Why don't you organise a tooth-brushing contest?

Intrusion

Monitor access to your home. Receive an alert if suspicious activity is detected in your absence.

Medication

Make sure you take your medication on time. Get a reminder if you forget. Track your intake. Monitor the regularity of an aged relative's intake, too.

Temperature

Measure the temperature anywhere you need to. Receive a warning if it's outside the interval you've set.

Drink

Figure out the amount of water you drink every day. Get a reminder if it's not enough.

Sleep

Automatically measure your sleep quality, the times you go to bed and get up, and wake up more gently.

Plants

Ever forget to water the plants? This Application makes sure you're giving them enough water and reminds you if need be.

Secrets

Privacy issues are not just an online concern. We all have our little secrets that nobody's allowed to touch. Keep an eye on yours and get an alert if they move.

Psychofridge

Get a warning if the refrigerator door has stayed open and things are warming up. Monitor its cooling cycle. Keep track of your sneaky snacks between meals.
