mother.

THE TECHNICAL SIDE OF MOTHER

- Mother, from Sen.se, is 6.3 inches tall and weighs one pound.
- Upon installation, caress her face. Mother's eyes will light up. She'll smile once she is linked to your online account.
- Mother connects to your router or internet box through an Ethernet cable
- Motion Cookies communicate with Mother using a proprietary radio standard developed by Sen.se on the 915 MHz frequency band (in North America) 868MHz (in Europe)
- Motion Cookies and Mothers have a range consistent with a home WiFi network. Cookies will work where your WiFi works.
- Motion Cookies transmit data to the nearest Mother. When out of range, they have the capacity to memorize up to 10 days of data. Data is uploaded to the system as soon as they encounter a Mother.
- Motion Cookies are powered by CR2016 button cells, and they're replaceable
- Applications for smartphones and tablets run on iOS (6.1 +) and Android (4.0+)
- Mother & the Motion Cookies are designed for indoor use. They are not weatherproof.
- Mother & the Motion Cookies are not toys. They should be kept out of the reach of children.
